# HANDY SNAP *Cup*

The Handy Snap Cup is the perfect tool for trim work, touch-ups or other craft projects. Made from TPE (Thermoplastic Elastomer) material, latex/water-based paint can easily be washed out with water and will also peel away after it dries so you can re-use it over and over again. The built-in ergonomic thumb hole allows for more comfortable, efficient painting. The solvent resistant Snap Cup holds up to a ½ pint of paint or stain and collapses for easy storage.
